

ONLINE ORDERING

ONLINE AUTOMATION FOR YOUR BUSINESS

Giving our operators' customers an avenue to place an order for curbside pickup or delivery is more important than ever. The MarketByte self-serve platform can lift your operation to a unique online ordering URL within an hour. Whether you have an existing website or not, we can get you online taking orders today!

Watch MarketBytes' promotional video on YouTube.

Operators will enjoy the first 6 months on the platform for \$49.50/month. Pricing remains affordable at \$99/month after the promotional time frame.

What's Included?

Self-service setup with unique URL to host online ordering page, complete with logo placement, online menu listing, instant website and menu modifier capability.

Ability for customers to place full order for pickup or delivery online, to include payment collection.

Touchless menu & payment options available via QR code or through Online Ordering site for dine-in customers.

MarketByte Merchant Services for all transactions:

- Simple, pay as you go pricing
- No setup fees, monthly fees or hidden fees
- Access to funds within 48 hours
- Card number encryption, with decryption keys saved on separate machines

Data collection opportunity based on operator's customer contact info collected during orders.

- Great for future SMS or email promotions

Advanced Analytics on site usage & sales reporting.

Additional MarketByte platforms are available to round out your digital marketing needs, including website design, social media control, review management & customer engagement tools.
